Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlay as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period. (Note 5)

Capital outlay	366,161
Depreciation expense	(158,587)
Excess of capital outlay over depreciation expense	

In the statement of activities, only the gain or loss on the sale of capital assets is reported. However, in the governmental funds, the proceeds from the sale increase financial resources. Thus, the change in net assets differs from the change in fund balance by the cost of the capital assets sold.

Donations of capital assets or transfers of capital assets to other funds affects net assets in the statement of activities, but these transactions do not appear in the governmental funds because they are not financial

resources.

Inventories of governmental funds are recorded as expenditures when purchased. However, in the statement of activities, inventories are expensed when consumed.

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.

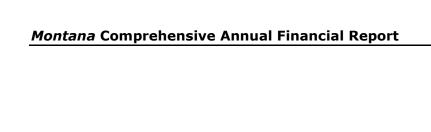

Internal service funds are used by management to charge the costs of certain activities, such as insurance and central computer services, to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.

The incurrence of long-term debt (e.g., bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. The details of these differences is as follows:

Bond proceeds	(59,490)
Bond premium	(828)
Capital lease financing	(874)
Principal retirement	33,767
Issuance costs deferral	704
Bond issuance costs amortization	(409)
Bond discount amortization	(14)
Bond premium amortization	1,284
Total long-term debt proceeds/repayment	

Some expenses reported in the statement of activities do not require the use of current financial resources, and therefore are not reported as expenditures in the governmental funds. The details of these differences is as follows:

Accrued interest	(245)	
Compensated absences	(6,430)	
OPEB implicit rate subsidy	(37,841)	
Early retirement benefits	3	
Arbitrage rebate tax	43	
Other liabilities	309
